EDUCATION

UNSW
BSc. Computer Science
Grad. 05/2022, HD WAM

AWARDS
2019 The Macquarie Performance Prize for highest academic performance in CSE (Year 1)
(1st Place)
2019 Co-op Scholarship
2019 Dean's Honours List
(Highly Commended)
2020 Dean's Honours List
(Highly Commended)
2020 Atlassian CTF
(5th Place)

MARKS
98 HD Programming Fundamentals
100 HD Computer Systems Fundamentals
90 HD Data Structures and Algorithms
85 HD Software Eng. Fundamentals
SY Extended Operating Systems
SY Extended Security Engineering
93 HD Software Sys Des & Implementat'n
95 HD Special Project A
94 HD Prog. Lang's & Compilers
93 HD Concepts of Prog. Langs
94 HD Educational Psychology
93 HD (In-)Formal Methods

PROJECTS

mipsy; **Rust**
An education-focused MIPS32 emulator aiming to provide excellent diagnostics and debugging capabilities for students learning assembly code.

Typing the technical interview; **Rust**
A demonstration of type-level programming, displaying the Turing-complete capability of Rust's powerful type system.

flymark; **Rust**
An asynchronous terminal-UI marking client used by teachers at UNSW to mark student assignments at speed.

talloc; **JavaScript**
Our full-stack application & hiring platform used by the school of CSE.

chomp; **Java**
HTTP-based Java interface messaging protocol, demonstrating low-level knowledge of the Java Virtual Machine.

EXPERIENCE

UNSW | Lecturer
May 2022 – Present (2 terms) | Sydney, AUS
- **22T3**: Proposed, designed, implemented, and lectured a brand new course COMP6991 - Solving Modern Programming Problems with Rust
- First offering of 100 students, coordinating a teaching team of 6.
- Managed overall administration and delivery of the course, including soliciting student feedback and iterating on design in response.
- **22T2**: Lectured and administrated core course COMP1521 - Computer Systems Fundamentals
- Approximately 800 enrolled students.
- Coordinated hiring & timetabling followed by in-session management of 33 teaching staff over $\approx$ 14 weeks.
- Managed overall administration and delivery of the course.

UNSW | Course Administrator / Teacher
May 2019 – May 2022 (9 terms) | Sydney, AUS
- Education, delivery, administration of Computer Science courses.
- Extensive Linux sysadmin, software development of course infrastructure.
- Teaching materials development, including software development of teaching tools (see: mipsy project).
- Teaching 1-3 classes each of 24 students per course offering.
- **COMP1521**: **Tutor** 20T2, 20T3, **Admin** 21T2, 21T3, 22T1
- **COMP2041**: **Admin** 21T1
- **COMP1511**: **AT** 19T2, **Tutor** 19T3, 20T1, 21T1.

AWS | Software Development Engineer
Sep 2020 – Feb 2021 | Sydney, AUS
- Worked in the AWS Redshift Team (cloud big-data) in a 6-month placement.
- Consolidated previous 40+ step process for customers to load sample data into a single simple step.
- Maintained strong project ownership, collaborated on overall architecture and deployed + monitored changes into live production.

UNSW CSESOC | Projects Director (Technical)
Dec 2020 – Dec 2021 | Sydney, AUS
Volunteering Position
- Co-Directed Projects Subcommittee; 7 direct-reports spanning 35 members.
- Liaised between reports (individual teams) and CSESoc executive team to manage progress, strategy and vision.
- Sole systems-administrator of CSESoc services, managed with Kubernetes control plane and Docker nodes.

THE NRMA | Software Developer
Nov 2018 – May 2020 | Sydney, AUS
- Developed a highly available, scalable IVR system with AWS cloud system which cut costs and simplified existing systems.
- Secured internal wiki with cross-origin token-based auth for critical NRMA roadside driver demo videos with AWS Cognito, S3, federated through varying authentication platforms.

ULFRIC PROJECTS | Software Developer
2015 – 2017 | FL, USA (Remote)
- Designed a variety of systems, including cost effective dynamic pre-emptive VMs on Google GCP to run game-servers.
- Worked on HTTP-based protocol with Java runtime bytecode manipulation to simplify API creation & interoperability.
